AMENDMENTS TO THE SPECIFICATION

Please amend page 11, lines 7-14, of the specification as follows:

The invention is in no way limited to the embodiments described before. Thus it is possible that the burner 34 is provided with a separate inlet for the supply of air. It is therefore not necessary that the burner is provided with air originating from the ventilator 68 and supplied or not supplied via the fuel cell 10 and/or the bypass ~~56-46~~ to the burner. In that case the bypass ~~56-46~~ can be omitted. Such variants are each deemed to fall within the scope of the invention.
